VISA BENEFITS COMPANION / CAPABILITY SHOWCASE

Plan a trip through conversation

Use your own questions and follow your interests. There is no fixed script.

https://walkingthroughdemo.roughdigits.com

Choose a sample account, then tell us what you want to enjoy

Sign in as Priya (Infinite), Alex (Infinite Privilege) or Mei (Signature), or explore as a guest. No password or real card details are needed. Describe your trip and the experience you want. Add interests, companions, dates, budget or dietary needs as the conversation develops.

Explore ideas while developing your whole trip

Ask about attractions, culture, food, shopping, entertainment, music, nightlife, outdoor activities, wellness, hotels or travel. A hotel question can be one part of a larger weekend. Open an offer or **Offer details** in a reply for its conditions, use **Add to plan** to save it in this browser, or **Next steps** to prepare a **demo request draft**. Nothing is sent or booked. On a phone, the trip bar opens the summary.

Search the benefits with your desktop or on-device AI

1. Open your AI chat. It needs web access or a working Visa connector.
2. Tell it to visit the website and paste a request such as:
"Go to https://walkingthroughdemo.roughdigits.com. I will be travelling from Singapore to Hanoi for work and pleasure. After the working week, I want to enjoy the weekend in Hanoi with my wife. Please query the Visa concierge and tell me which benefits we can use to make it a great weekend. My demo user is Alex Chen."
3. This demo has only three preconfigured users: **Alex Chen** (Infinite Privilege), **Priya Tan** (Infinite) and **Mei Lim** (Signature). Replace the name to try another sample card.
4. Answer any follow-up questions about interests or dates. Ask your AI to check guest coverage and offer conditions.

Current demonstration scope

The synthetic catalogue covers **61 cities** across APAC (including Japan and mainland China), the US, UK and Europe. Use **Explore** for destinations and categories. Simulated benefits include free entry, extras, discounts, credits, upgrades and priority requests, subject to conditions.

Please respect these limits when trying the showcase

Use the listed destinations and fictional personal details. Vary your questions naturally within travel and benefits planning; this is not a general-purpose assistant. Content is curated and generated for demonstration, so some cities, venues, events or interests are missing. Missing coverage does not mean real Visa benefits do not exist. Tell us where the conversation or options fall short.

Everything is simulated. Accounts, partners, prices and offer terms are fictional; photos are illustrative. There is no live issuer verification, event inventory, provider contact, reservation, payment, redemption or issued access code. Priority booking is a request, not confirmed availability. Card qualification checks only the sample card rule. No real merchant partnership is implied.

Age, party-size, date and other offer conditions must be checked. Dietary requests require provider confirmation; allergy safety is never guaranteed. Currency amounts are local illustrations, with no live exchange-rate conversion. Conversations reset on account changes, server restart or inactivity; saved plans remain in the browser.

What should we improve?

A question that was misunderstood, a missing benefit, or an improvement
